What you get

Standard service: Charge covers setup, basic image-optimization, transfer to CD, postage and handling. Every effort will be made to produce the best possible output images from your slides/negatives and we will attempt to remove the effects of scratches or dirt on your slides from the output images (*please note:* it may not be possible to completely remove all such defects). Output files are high-quality JPEG image files suitable for standard 6 x 4 inch prints (@ 300 ppi - 1800 x 1120 pixel approx*)

Standard plus service: As for *standard service* with an additional set of smaller images suitable for email/web use (@ 72 ppi - approx. 600 x 375 pixel).

Deluxe service: As for *standard plus service* with an additional set of larger images suitable for enlargements to approx. A4 size (@ 300 ppi - approx. 3500 x 2250 pixel).

Extras & exclusions: An additional charge of 30 cents per slide will apply for straightening & custom image cropping (per your instructions). Additional charges will also apply for custom colour correction or other kinds of image

processing, or larger output file sizes, if required. Scanning charges for strips of 35mm film negatives or larger-format slides/negatives can be quoted on request. *Note:* Charges quoted in the above table do *not* apply for non-standard slide sizes but the job can be quoted. **Add \$4 for return by Registered Post.**

^a **Quantities (slides):** Slides are processed in batches of 8 requiring that your order be rounded up to the nearest number in the above table (e.g. if you supply 20 slides, you will be charged for 24 slides).

* depending on the slide width-to-height ratio
